# DON'T BANK ON THE BOMB

A Global Report on the Financing of Nuclear Weapons Producers

Hall of Shame November 2015

### **Utrecht, November 2015**

PAX has strived to achieve the highest level of accuracy in reporting. However, at this point, there is still a marked lack of official information available in the public domain about the use, production, transfer and stockpiling of nuclear weapons, as well as about investments in companies that produce nuclear weapons. The information in this report therefore reflects official information available in the public domain known to PAX. We welcome comments, clarifications, and corrections from governments, companies, financial institutions and others, in the spirit of dialogue, and in the common search for accurate and reliable information on this important subject. If you believe you have found an inaccuracy in our report, or if you can provide additional information, please contact us: <a href="mailto:snyder@paxforpeace.nl">snyder@paxforpeace.nl</a> or <a href="mailto:vander@paxforpeace.nl">vanderzeijden@paxforpeace.nl</a> or

# Hall of Shame

This section details financial relationships with the nuclear weapons producing companies identified in this report. It provides information about the banks, pension funds, insurance companies and asset management companies that provide financing for the companies involved in the nuclear weapons industry. In this section we provide details about the nature and value of specific transactions and holdings.

Financial institutions can be involved in financing companies by providing corporate loans, by assisting companies with share- and bond issues, and by (managing) investments in shares and bonds of these companies. For asset managers and pension funds, the only relevant type of financial involvement is (managing) share- and bondholdings of the selected companies.

This report presents the most significant financing relationships with one or more of the selected nuclear weapon companies. To select these financial institutions, the following criteria were used:

- All financial institutions involved in loans and underwriting deals for one or more of the companies since 1 January 2012;
- All financial institutions that own at least 0.5% of the outstanding shares or bonds of at least one of the companies.

We found 382 financial institutions that meet these criteria.

## How is the information presented?

Financial institutions are listed alphabetically in this chapter. Each section provides the following information for each financial institution:

- The total amount the financial institution made available to the nuclear weapons producers listed in the report since January 1, 2012.
- The types of financial relations with the nuclear weapon companies grouped by loans, investment banking and asset management. Financial activities are listed alphabetically by nuclear weapon producing company for each category.
- The details of the financial relationship, including the name of the producing company, the amount, and the date. For loans and bonds the maturity date is given.

All data is presented in tables. For loans, the first column represents the names of the companies that received the loans, the second column shows which subsidiary or part of the selected company has issued the loan. The third column (# Fl's), shows the number of financial institutes participating in loans as loans are often offered by a syndicate of financial institutions. The fourth column represents the value of the total loan offered by the syndicate to the company. The fifth column is the amount for which this specific financial institute participated in the loan. This amount is calculated depending on the role the financial institute plays in the syndicate, as explained below. The last column shows the date the loan was issued.

#### Loan tables basically look like this:

| Nuclear      | Number of        | Total value of | Amount this     | Date the loan | Date the loan |
|--------------|------------------|----------------|-----------------|---------------|---------------|
| weapons      | financial        | the loan       | financial       | was issued    | will expire   |
| producing    | institutions     |                | institution     | (closed).     | (maturity     |
| company that | participating in |                | invested in the |               | date).        |
| got the loan | the loan         |                | loan            |               |               |

The tables for underwriting of share and bond issuances have the same columns. The method for calculating these value per financial institute can be found below.

The tables for share and bondholdings managed by the financial institutions show the nuclear weapon producing companies, the country in which this company is situated, the percentage of all bonds or shares outstanding hold or managed by the specific institution, and the total value of the shares or bonds held by the financial institution in the indicated company.

#### Share and bondholding tables basically look like this:

| Nuclear weapons   | Country of origin for | Percentage of all     | Total value, in USD     |
|-------------------|-----------------------|-----------------------|-------------------------|
| producing company | nuclear weapons       | outstanding shares    | millions, of the shares |
|                   | producer              | or bonds that this    | or bonds held by this   |
|                   |                       | financial institution | financial institution.  |
|                   |                       | holds                 |                         |

If the amounts per financial institution were known, these amounts were assigned. If the amounts were unknown, an estimate was used. The estimates are based on the following rules of thumb:

- In the case of loans (corporate loans or revolving credit facilities), 40% of the total amount is committed by bookrunners and 60% by other participants of the syndicate. If, however, the amount of bookrunners is (almost) equal to, or higher than, the amount of participants, the reverse is used: 60% for the bookrunners and 40% for the arrangers. So if there are for example 5 bookrunners and 4 participants and the amount of the loan is € 100, the estimate will be that the bookrunners commit 60% (€ 12 each) and the participants 40% (€ 10 each). The amount provided by bookrunners is *always* higher than the amount provided by other participants;
- In the case of share- and bond issuances, 75% of the total amount is committed by bookrunners and 25% by other participants of the syndicate. The amount provided by bookrunners should

always be higher than the amount provided by other participants.

• In the case of share- and bondholdings, the amounts are always known, so no estimate is needed.

Figures presented are rounded up/down to the nearest dollar at the filing date. Commas (,) indicate thousands separaters while periods (.) used as decimal points. Financial institutions operating in Bermuda, Guernsey and Jersey are noted, but classified in summary tables and documents as UK based.

# Methodology

#### How was the research conducted?

Which financial institutions are involved in the financing of the selected nuclear weapon companies was researched in annual reports, stock exchange filings and other publications of the companies concerned, archives of trade magazines, local newspapers and the financial press as well as specialized financial databases (Thomson ONE, Bloomberg).

#### What is included?

All forms of financing meeting the definition of substantive financial relationships are included in the report. This comprises financial institutions participating in loans and underwriting deals since 1 January 2012, as well as those involved in loans which have been closed before that date but have not yet matured at the time of writing.

For (managing) investments in shares or bonds of nuclear weapon companies, a group-level threshold of at least 0.5% of the outstanding shares or bonds at most recent filing dates is applied per financial institution.

The following information is provided for each form of financing qualifying as substantive:

- Name of the company receiving financing;
- Type of financing (loan, guarantee, share issuance, bond issuance, share ownership, bond ownership, other);
- Total amount;
- For share- and bondholdings: percentage of all shares or bonds outstanding at the most recent filing date;
- Filing / closing date;
- For loans and bond issuances: Maturity;
- For loans, bond and share issuances: Amounts provided by each financial institution participating.

#### What definitions are used?

The following definitions are used in this project:

- Financial institutions: banks, pension funds, asset managers, insurance companies and other financial institutions from any country in the world;
- Nuclear weapon producing companies: companies involved in producing or maintaining nuclear weapons or significant, specific components thereof. Which share of the company's turnover this activity constitutes is not deemed relevant;
- Substantive involvement in financing: financial institutions can be involved in financing nuclear weapon companies by providing corporate loans, project finance or working capital facilities; by underwriting share and bond issuances; and by (managing) investments in shares and bonds of these companies.
- All participation in loans and underwriting deals since 1 January 2012 is considered to be of substantive importance. Also participation in loans which have been closed before that date but have not yet matured at the time of writing is included in the analysis.
- Shareholdings at the most recent filing date are considered to be substantive if the investments

of a financial institution at group-level reach or cross the threshold of 0.5% of the company's outstanding shares.

• Bondholdings at the most recent filing date are considered to be substantive if the investments of a financial institution at group-level reach or cross the threshold of 0.5% of the company's outstanding bonds.

## What are the different types of financial relationships?

Financial institutions can be involved in financing companies by providing corporate loans, by assisting companies with share- and bond issues, and by (managing) investments in shares and bonds of these companies.

- Share issues: Issuing shares on the stock exchange gives a company the opportunity to increase its equity by attracting a large number of new shareholders or increase the equity from its existing shareholders.
- When it's the first time a company offers its shares on the stock exchange, this is called an Initial Public Offering (IPO). When a company's shares are already traded on the stock exchange, this is called a secondary offering of additional shares. To arrange an IPO or a secondary offering, a company needs the assistance of one or more (investment) banks, which will promote the shares and find shareholders. The role of investment banks in this process therefore is very important.
- Bond issues: Issuing bonds can best be described as cutting a large loan into small pieces, and selling each piece separately. Bonds are issued on a large scale by governments, but also by corporations. Like shares, bonds are traded on the stock exchange. To issue bonds, a company needs the assistance of one or more (investment) banks which underwrite a certain amount of the bonds. Underwriting is in effect buying with the intention of selling to investors. If the investment bank fails to sell all bonds it has underwritten, it will end up owning the bonds.
- (Managing) shareholdings: Financial institutions can, through the funds they are managing, buy shares of a certain company. This provides the company with new equity, and gives the bank a direct influence on the company's strategy. The magnitude of this influence depends on the size of the shareholding.
- (Managing) investments in bonds: Financial institutions can also buy bonds of a certain company. The main difference between owning shares and bonds is that owner of a bond is not a co-owner of the issuing company; the owner is a creditor of the company. The buyer of each bond is entitled to repayment after a certain number of years, and to a certain interest during each of these years.
- Loans: The easiest way to obtain debt is to borrow money. In most cases, money is borrowed from commercial banks. o The proceeds of corporate loans can be used for all activities of the company. Loans can be either short-term or long-term.
  - Short-term loans (including trade credits, current accounts, leasing agreements, et cetera) have a maturity of less than a year. They are mostly used as working capital for day-to-day operations. Short-term debts are often provided by a single commercial bank, which does not ask for substantial guarantees from the company.
  - Long-term loans have a maturity of at least one year, but generally of three to ten years. Long-term corporate loans are in particular useful to finance expansion plans, which only generate rewards after some period of time.
  - Loan syndicates often arrange long-term loans. A loan syndicate is a group of banks brought together by one or more arranging banks. The loan syndicate will only undersign the loan agreement if the company can provide certain guarantees that interest and repayments on the loan will be fulfilled.

- A **revolving credit facility** is a type of loan that provides a company with an option to take up a loan from a bank (or more often: a banking syndicate) when it has an urgent financing need. Revolving credits are often concluded for a five year period and then renewed. But many companies renegotiate their revolving credit facility every year with the same banking syndicate. Amounts, interest rates, fees and participating banks can change slightly every year. As the financial press often reports these renegotiations for larger companies, this might raise the impression that banks are lending huge sums of money to the same company every year. But: this concerns renegotiations of basically the same facility and a revolving credit facility is hardly ever actually called upon for a loan.
- Project finance: Project finance is a specific long-term loan. The proceeds of this loan can only be used to finance a specific project: a mine, pipeline, wind farm, road, etc. Project finance is often extended by a banking syndicate, like corporate loans. Different from corporate loans, the repayment of a project finance loan is dependent upon the revenues that a project is expected to generate once it is up and running. To guarantee the payment of interest and repayments as much as possible, the banks usually demand that the revenues of the project must be used first to pay interest and repayment. Only if the revenues are large enough, the remainder will be paid out as dividend to the owner(s) of the project.
- Banks run a fairly high risk with this form of loans: if the project is not successful and does not generate (sufficient) revenues, they will not receive interest and repayments (or less than agreed). In that case, the banks do not have the option (or only to a very limited extent) to call upon the owner(s) of the project to pay interest and repayments from the revenues generated by other activities of the owner(s). This is called non-recourse or limited-recourse financing.
- Because banks run a higher risk with a project finance loan, they will carefully evaluate the project in advance and will demand to be closely involved in the day-to-day running of the project. Also, banks will demand a higher interest rate for project financing loans. This makes project financing loans less attractive for most companies planning to develop a project. Project finance is a niche market for financing projects under specific circumstances, e.g. if the project is very large compared to the size of the owner, or if some of the owners of the project do not have cheaper financing options available.

For asset managers and pension funds, the only relevant type of financial involvement is (managing) share- and bondholdings of the selected companies.

## What are the differences between the 2014 and 2015 reports?

Previous Don't Bank on the Bomb reports included only new loans made during the research period. This report includes information about all outstanding loans. This provides a fuller picture of the overall investments in nuclear weapons producing companies. Included in the 2015 study are loans and credit facilities of which the closing date lies before January 2012, but that have not matured yet at the time of writing (August 2015). In at least one known case this leads to the inclusion of one tranche of a credit facility while the other tranche is excluded. The US\$ 4.6 billion revolving credit facility issued by Boeing on 5 November 2011 had a US\$ 2.3 billion tranche with maturity date on 8 November 2012 and a US\$ 2.3 billion tranche with maturity date on 10 November 2016. Only the latter has been included. In the 2014 report, occasional errors in the Thomson One Banker database regarding the listing of banks and their role in certain loans resulted in errors where some participating managers were accidentally assigned as bookrunners while some bookrunners were accidentally assigned as only participating managers. This has been corrected in the 2015 report.

## 157. Guilford (United States)

Guilford (United States) has made an estimated US\$ 451 million available to the nuclear weapons

companies listed in this report since January 2012.

Guilford (United States) owns or manages bonds of the nuclear weapon companies for an amount of US\$ 451 million (see table below). Only holdings of 0.50% or more of the outstanding bonds at the most recent available filing date are included.

### Bondholdings managed by Guilford

| Company          | Country        | Total value<br>(US\$ mln) | % Outstanding | Filing date |
|------------------|----------------|---------------------------|---------------|-------------|
| BAE Systems      | United Kingdom | 109                       | 2.08          | 31-3-2015   |
| Boeing           | United States  | 71                        | 0.83          | 31-3-2015   |
| Lockheed Martin  | United States  | 80                        | 0.87          | 31-3-2015   |
| Northrop Grumman | United States  | 106                       | 1.63          | 31-3-2015   |
| Raytheon         | United States  | 85                        | 1.58          | 31-3-2015   |

Source: Thomson Eikon, "Bond ownership: most recent filings", viewed in August 2015.

## 158. Gulf Bank (Kuwait)

Gulf Bank (Kuwait) has made an estimated US\$ 13 million available to the nuclear weapons companies listed in this report since January 2012.

Gulf Bank (Kuwait) provided loans for an estimated amount of US\$ 13 million to the nuclear weapon companies (see table below). The table shows all loans closed since January 2012 or maturing after August 2015.

#### Loans provided by Gulf Bank

| Company          | Total value<br>(US\$ mln) | Est.<br>participation<br>of this bank<br>(US\$ mln) | Closing date | Maturity date |
|------------------|---------------------------|---|--------------|---------------|
| Northrop Grumman | 500                       | 13  | 18-8-2012    | 3-9-2013      |

Source: Thomson ONE Banker, "Loans", viewed in August 2015.

## 159. Gulf İnternational Bank (Bahrain)

Gulf International Bank (Bahrain) has made an estimated US\$ 76 million available to the nuclear weapons companies listed in this report since January 2012.

Gulf International Bank (Bahrain) provided loans for an estimated amount of US\$ 76 million to the nuclear weapon companies (see table below). The table shows all loans closed since January 2012 or maturing after August 2015.

### Loans provided by Gulf International Bank

|   | Company  | Total value<br>(US\$ mln) | Est.<br>participation<br>of this bank<br>(US\$ mln) | Closing date | Maturity date |
|---|----------|---------------------------|---|--------------|---------------|
| ſ | Raytheon | 1,400                     | 76  | 13-12-2011   | 13-12-2016    |

Source: Thomson ONE Banker, "Loans", viewed in August 2015.

## 160. Hahn Capital Management (United States)

Hahn Capital Management (United States) has made an estimated US\$ 40 million available to the nuclear weapons companies listed in this report since January 2012.

Hahn Capital Management (United States) owns or manages shares of the nuclear weapon companies

for an amount of US\$ 40 million (see table below). Only holdings of 0.50% or more of the outstanding shares at the most recent available filing date are included.

#### Shareholdings managed by Hahn Capital Management

| Company            | Country       | Total value<br>(US\$ mln) | % Outstanding | Filing date |
|--------------------|---------------|---------------------------|---------------|-------------|
| Jacobs Engineering | United States | 40                        | 0.72          | 31-3-2015   |

Source: Thomson ONE Banker, "Share ownership: most recent filings", viewed in August 2015.

## 161. Hancock Holding (United States)

Hancock Holding (United States) has made an estimated US\$ 68 million available to the nuclear weapons companies listed in this report since January 2012.

Hancock Holding (United States) provided loans for an estimated amount of US\$ 68 million to the nuclear weapon companies (see table below). The table shows all loans closed since January 2012 or maturing after August 2015.

#### Loans provided by Hancock Holding

| Company          | Total value<br>(US\$ mln) | Est.<br>participation<br>of this bank<br>(US\$ mln) | Closing date | Maturity date |
|------------------|---------------------------|---|--------------|---------------|
| Babcock & Wilcox | 700                       | 32  | 22-5-2012    | 8-6-2017      |
| Babcock & Wilcox | 600                       | 36  | 11-5-2015    | 11-5-2020     |

## 220. Lyrical Partners (United States)

Lyrical Partners (United States) has made an estimated US\$ 78 million available to the nuclear weapons

companies listed in this report since January 2012.

Lyrical Partners (United States) owns or manages shares of the nuclear weapon companies for an amount of US\$ 78 million (see table below). Only holdings of 0.50% or more of the outstanding shares at the most recent available filing date are included.

#### **Shareholdings managed by Lyrical Partners**

| Company | Country       | Total value<br>(US\$ mln) | % Outstanding | Filing date |
|---------|---------------|---------------------------|---------------|-------------|
| Aecom   | United States | 78                        | 1.70          | 31-3-2015   |

Source: Thomson ONE Banker, "Share ownership: most recent filings", viewed in August 2015.

## 221. M&G Investments (United Kingdom)

M&G Investments (United Kingdom) has made an estimated US\$ 70 million available to the nuclear weapons companies listed in this report since January 2012.

M&G Investments (United Kingdom) owns or manages bonds of the nuclear weapon companies for an amount of US\$ 70 million (see table below). Only holdings of 0.50% or more of the outstanding bonds at the most recent available filing date are included.

### Bondholdings managed by M&G Investments

| Company     | Country        | Total value<br>(US\$ mln) | % Outstanding | Filing date |
|-------------|----------------|---------------------------|---------------|-------------|
| BAE Systems | United Kingdom | 70                        | 1.34          | 28-2-2015   |

Source: Thomson Eikon, "Bond ownership: most recent filings", viewed in August 2015.

### 222. M&T Bank (United States)

M&T Bank (United States) has made an estimated US\$ 628 million available to the nuclear weapons companies listed in this report since January 2012.

M&T Bank (United States) provided loans for an estimated amount of US\$ 628 million to the nuclear weapon companies (see table below). The table shows all loans closed since January 2012 or maturing after August 2015.

#### Loans provided by M&T Bank

| Company            | Total value<br>(US\$ mln) | Est.<br>participation<br>of this bank<br>(US\$ mln) | Closing date | Maturity date |
|--------------------|---------------------------|---|--------------|---------------|
| Aecom              | 700                       | 35  | 14-10-2011   | 19-10-2016    |
| Aecom              | 1,000                     | 50  | 14-10-2011   | 19-10-2016    |
| Aerojet Rocketdyne | 100                       | 8   | 30-5-2014    | 30-5-2019     |
| Aerojet Rocketdyne | 200                       | 15  | 30-5-2014    | 30-5-2019     |
| Moog               | 900                       | 180   | 18-3-2011    | 18-3-2016     |
| Moog               | 900                       | 120   | 28-3-2013    | 28-3-2018     |
| Moog               | 1,100                     | 220   | 22-5-2014    | 22-5-2019     |

# 321. State Bank of İndia (İndia)

State Bank of India (India) has made an estimated US\$ 111 million available to the nuclear weapons companies listed in this report since January 2012.

State Bank of India (India) provided loans for an estimated amount of US\$ 110 million to the nuclear weapon companies (see table below). The table shows all loans closed since January 2012 or maturing after August 2015.

Loans provided by State Bank of India

| Company     | Total value<br>(US\$ mln) | Est.<br>participation<br>of this bank<br>(US\$ mln) | Closing date | Maturity date |
|-------------|---------------------------|---|--------------|---------------|
| Aecom       | 750                       | 20  | 7-6-2013     | 7-6-2018      |
| Boeing      | 2,473                     | 30  | 23-9-2014    | 15-10-2015    |
| Boeing      | 2,473                     | 30  | 23-9-2014    | 16-10-2019    |
| Orbital ATK | 1,010                     | 17  | 8-10-2013    | 1-11-2018     |
| Orbital ATK | 700                       | 12  | 8-10-2013    | 1-11-2018     |

Source: Thomson ONE Banker, "Loans", viewed in August 2015.

State Bank of India (India) underwrote bond issuances for an estimated amount of US\$ 2 million to the nuclear weapon companies since January 2012 (see table below).

#### Underwriting of bond issuances by State Bank of India

| Company         | Total value<br>(US\$ mln) | Est.<br>participation<br>of this bank<br>(US\$ mln) | Issue date | Maturity<br>date |
|-----------------|---------------------------|---|------------|------------------|
| Larsen & Toubro | 8                         | 2   | 20-3-2014  | 27-3-2024        |

### 322. State Farm (United States)

State Farm (United States) has made an estimated US\$ 871 million available to the nuclear weapons companies listed in this report since January 2012.

State Farm (United States) owns or manages bonds of the nuclear weapon companies for an amount of US\$ 871 million (see table below). Only holdings of 0.50% or more of the outstanding bonds at the most recent available filing date are included.

#### **Bondholdings managed by State Farm**

| Company                 | Country        | Total value<br>(US\$ mln) | % Outstanding | Filing date |
|-------------------------|----------------|---------------------------|---------------|-------------|
| BAE Systems             | United Kingdom | 45                        | 0.86          | 31-3-2015   |
| Boeing                  | United States  | 46                        | 0.54          | 31-3-2015   |
| Fluor                   | United States  | 72                        | 6.99          | 31-3-2015   |
| General Dynamics        | United States  | 93                        | 2.73          | 31-3-2015   |
| Honeywell International | United States  | 219                       | 3.37          | 31-3-2015   |
| Lockheed Martin         | United States  | 144                       | 1.57          | 31-3-2015   |
| Northrop Grumman        | United States  | 78                        | 1.19          | 31-3-2015   |
| Raytheon                | United States  | 175                       | 3.24          | 31-3-2015   |

Source: Thomson Eikon, "Bond ownership: most recent filings", viewed in August 2015.

### 323. State Fund (United States)

State Fund (United States) has made an estimated US\$ 134 million available to the nuclear weapons companies listed in this report since January 2012.

State Fund (United States) owns or manages bonds of the nuclear weapon companies for an amount of US\$ 134 million (see table below). Only holdings of 0.50% or more of the outstanding bonds at the most recent available filing date are included.

#### **Bondholdings managed by State Fund**

| Company                 | Country       | Total value<br>(US\$ mln) | % Outstanding | Filing date |
|-------------------------|---------------|---------------------------|---------------|-------------|
| Honeywell International | United States | 73                        | 1.13          | 31-3-2015   |
| Raytheon                | United States | 61                        | 1.13          | 31-3-2015   |
